ENTERAL NUTRITIONAL FORMULA

Benefit Coverage Criteria is limited to:

- Beneficiaries who are **fed via** nasogastric, gastrostomy or jejunostomy **tube**.
- Beneficiaries with **inborn metabolic disorders**.
- **Children up to 21 years of age**, who require liquid oral nutritional therapy when there is a documented diagnostic condition where caloric and dietary nutrients from food cannot be absorbed or metabolized.

Documentation Requirements

- The therapy must be an integral component of a documented medical treatment plan and ordered in writing by an authorized practitioner. It is the responsibility of the practitioner to maintain documentation in the beneficiary's record regarding the medical necessity for enteral nutritional formula.
- The physician or other appropriate health care practitioner has documented the beneficiary's nutritional depletion.
- Medical necessity for enteral nutritional formula must be substantiated by documented physical findings and/or laboratory data (e.g., changes in skin or bones, significant loss of lean body mass, abnormal serum/urine albumin, protein, iron or calcium levels, or physiological disorders resulting from surgery, etc.)
- Documentation for beneficiaries who qualify for enteral formula benefit must include an established diagnostic condition and the pathological process causing malnutrition and one or more of the following items:
 - (a) Clinical findings related to the malnutrition such as a recent involuntary weight loss or a child with no weight or height increase for six months.
 - (b) Laboratory evidence of low serum proteins (i.e., serum albumin less than 3 gms/dl; anemia or leukopenia less than 1200/cmm);
 - (c) Failure to increase body weight with usual solid or oral liquid food intake.

Additional Information:

- Non-standard infant formulas are reimbursable by Medicaid under the appropriate enteral therapy code.
- The calculation for pricing enteral formula is as follows: Number of calories per can divided by 100 equals the number of caloric units per can.
- Enteral formula requires voice interactive prior authorization, as indicated by the “*” next to the code description. The prescriber must write the prior authorization number on the fiscal order and the dispenser completes the authorization process by calling (866) 211-1736. For requests that exceed 2,000 calories per day for qualifying beneficiaries, a prior approval request may be submitted with medical justification.
- The New York State Medicaid Program does not cover enteral nutritional therapy as a convenient food substitute.
- Standard milk-based infant formulas are not reimbursable by Medicaid.

4.5 PHARMACISTS AS IMMUNIZERS

The administration of select vaccines by qualified pharmacists employed by, or under contract with, Medicaid enrolled pharmacies is reimbursable under NYS Medicaid. Administration of vaccines is conducted pursuant to NYS Education Law and regulations (8NYCRR63.9) which permits licensed pharmacists who obtain additional certification to administer influenza and pneumococcal vaccinations to adults 18 years of age and older.

Reimbursement is based on a patient specific or non-patient specific order. These orders must be kept on file at the pharmacy. The ordering prescriber's NPI is required on the claim for the claim to be paid.

Pharmacies must bill the administration and cost of the vaccine using the following **procedure codes**. NDCs are not to be used to bill the vaccine product. Reimbursement for the product is made at no more than the *actual* acquisition cost to the pharmacy. No dispensing fee or enrollee co-payment applies. Pharmacies must bill with a quantity of "1" and a day supply of "1".
