

Attention Physicians Changes in Allergy Services

As a result of the National Correct Coding Initiative (NCCI) changes in the max units allowed for allergy services (95120-95134), Medicaid will also decrease the max units on file to be consistent with NCCI.

For dates of service on or after October 1, 2012, the max units will be reduced to 1.

The fee for 95125 (professional services for allergen immunotherapy in prescribing physician's office or institution, including provision of allergenic extract; 2 or more injections) will be repriced to \$21.86 with a max unit of 1. To receive additional compensation, providers must indicate the number of injections administered on the claim form and attach supporting documentation substantiating the additional injections.
